

IMPULSE

Issue 01 | 2021

Dear readers,
it is time for the next. Now, you have received our latest issue of Impulse with current information about the world of motors.

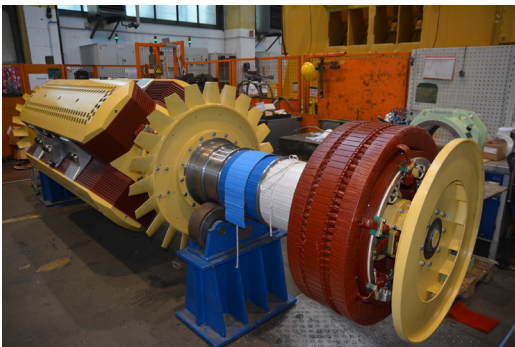

These are our topics:

- [Expansion of our turbo-compressor motors](#)
- [18th Technical Conference of VEM](#)
- [VEM competencies also in demand in Malaysia](#)

We hope that you enjoy the read.

Best regards,
Your VEM team

Expansion of our turbo-compressor motors

The VEM Group always focuses on meeting customer requirements. This goes hand in hand with the constant development of motors with increasing performance. This was also the case with an order received by the Sachsenwerk in Dresden ...

18th Technical Conference of VEM

Invitation

Technical Conference

14th and 15th September 2021
in Wernigerode

TECHNICAL CONFERENCE

We cordially invite you to VEMs 18th Technical Conference, which traditionally deals with the latest developments in drives. Main topics of the two day event will be, amongst others:

- product innovations for low- and high-voltage applications, as well as for drive systems
- digitisation of the branch
- recent technological advances in electrical engineering
- latest European legislation on energy efficiency and their effects

Please have a look on the VEM [event site](#) to get more information as well as the [conference program](#). We are looking forward to share opinions and experiences with you in September 2021.

VEM competencies also demand in Malaysia

The fact that trade fairs represent an important point of contact between manufacturers and buyers is demonstrated by the orders received for motors used for through-ventilated IP23 drives and surface-cooled IP55 drives at the TOC Asia 2019. The fair ...
